This is the first screen you’ll see through the link! You can begin searching by clicking the “START NOW” button, or scroll down to learn more about this resource!

Find your way to a great job! START NOW

*All of the information and data used is FROM Illinois FOR Illinois! How awesome is that?!*
After Clicking “START NOW” you’ll go to this screen- prompting you about furthering your education. If you click “YES” it will ask what degree you want. If you click “NOT SURE” you will be sent to the following screen:

In this example I chose “YES”. Which creates a dropdown of careers to choose from.
Next you’ll find the many different career options and their corresponding earnings, stability, and earning growth!
Within the previous screen, you can click on any of the careers and you’ll get this pop-up. Where you can look at descriptions, related occupations, and pathways!
You'll be sent to this screen if you clicked “see paths…” on the small pop up. This shows you different levels of education and the proportion to the chosen career.
Another awesome page shows you earning, employment, and stability data for different areas of study!
If you click on your desired area of study (I chose Psychology) you'll receive this pop-up. Where you can learn more about it.

If you choose to show colleges that offer your desired degree you will be sent to this pop-up, giving you information on all of the colleges in Illinois that provide your area of study and degree. My favorite part is that it shows you cost of tuition, average debt, and average earning!
Overall, there is plenty of different options to choose from and explore! Whether you want to go into teaching, automotive repair, or aerospace engineering there is beneficial information for YOU!

The best way to learn and understand this resource is to simply look around it!

It’s time to plan your academic future!
